

# RESHMI H L

## Full Stack Web Developer

6474822049 | reshmihl94@gmail.com | Toronto | LinkedIn | GitHub

### PROFESSIONAL SUMMARY

Versatile and detail-oriented Full Stack Web Developer with over 5 years of experience building scalable, cloud-based applications. Adept in modern web frameworks like Angular and React, object-oriented programming with C#/.NET Core, and working with relational databases including MS SQL. Proven ability to gather and analyze user requirements, prototype quickly, and scale solutions in cloud environments. Strong collaborator with excellent problem-solving and communication skills, ensuring seamless integration and optimized data flow across systems.

### TECH STACK

- **Languages & Frameworks:** C#, .NET Core, JavaScript, Python, Java, Groovy, Node.js, React.js, Angular
- **Web & Service Architecture:** REST APIs, JSON, HTTP, TCP, Multi-threaded Programming, Design Patterns
- **Front End:** HTML5, CSS3, Bootstrap, JavaScript, React.js, Angular.js
- **Back End:** .NET Core, Node.js, Python, Django, Express
- **Databases:** MS SQL (T-SQL, SSIS, SSRS), MySQL, MongoDB, DynamoDB, PostgreSQL
- **Cloud & DevOps:** Azure, AWS, GCP, Docker, Kubernetes
- **Analytics & Reporting:** Power BI, Grafana
- **Tools & Platforms:** JIRA, Confluence, ServiceNow, Git, Bitbucket, Jenkins

### EXPERIENCE

**FREELANCE DEVELOPER | AfterQuery**

Feb 2025 - Present

An AI-focused startup pioneering cognitive solutions across various industries.

- Contributed to open-source Python projects as part of an AI training initiative.
- Fixed verified issues in large repositories.
- Wrote unit tests, created patch files, and documented solutions.
- Used Docker to replicate and validate bugs before submission.

**Technologies:** Python, Docker, Git, PyTest, unittest

**FULL STACK DEVELOPER INTERN | Iter Innovandi**

Jul 2024 - May 2025

An AI-focused startup pioneering cognitive solutions across various industries.

- Developed full-stack web applications using Angular, React, Node.js, and Python in an agile cloud environment.
- Designed service-oriented architecture solutions with REST APIs to ensure modularity and automation.
- Supported data-driven solution optimization and implemented prototypes for iterative user feedback.
- Ensured data synchronization across systems for accurate analytics and reporting.

**Technologies:** React, Angular, Node.js, Python, MS SQL, MongoDB, Docker, AWS, JIRA

**FULL STACK DEVELOPER | NeST Digital**

Aug 2022 - Aug 2023

NeST Digital is a leading technology solutions provider specializing in digital transformation services for enterprises worldwide.

- Developed and scaled enterprise applications using Angular and .NET Core, following industry-standard OOP and multi-threaded design patterns.

- Integrated MS SQL databases and implemented stored procedures and queries (T-SQL) for seamless backend operations.
- Used Docker and Azure for deploying scalable cloud services, ensuring high availability and performance.
- Collaborated with cross-functional teams to gather requirements and deliver user-centric solutions with automation-ready architecture.

**Technologies:** .NET Core, Angular 14, MS SQL (T-SQL), MongoDB, Docker, Azure

## FULL STACK DEVELOPER | Singularis Software Technologies

Jul 2019 - Aug 2022

Singularis Software Technologies is an IT services company focusing on cloud-native solutions for embedded systems and networking technologies.

- Created CMS and e-commerce solutions using WordPress, Shopify, and Printful with strong UI/UX emphasis.
- Conducted performance optimization, responsive design implementation, and seamless third-party integrations.
- Managed cloud storage using S3, configured Apache/Nginx servers, and deployed scalable applications.
- Supported user onboarding and data transitions for automation-ready system deployment.

**Technologies:** WordPress, HTML5, CSS3, JavaScript, Shopify, Printful, Mailchimp, Apache, S3

## EDUCATION

---

- Post graduate certificate in Web Development, Humber College, ON, Canada (Dean's List)
- Post graduation certificate in Cloud Computing, Humber College, ON, Canada (Dean's List)
- Master of Computer Application, Bharathiar University, India
- Bachelor of Computer Science, Kerala University, India

## PROJECTS

---

### E-Waste Management System : [Link](#)

- Developed a full-stack web app for e-waste management using C# and Angular.
- Deployed with Docker and Kubernetes, with data stored in MySQL.
- **Technologies:** C#, Angular, Docker, Kubernetes, MySQL

### BrickMMO Stock Media: [Demo](#) | [GitHub](#)

- Developed a web platform for distributing BrickMMO media using PHP and Laravel.
- Integrated Google Drive API for automatic media import and deployed media assets on Google Cloud Platform (GCP).
- Implemented search, filtering, and download tracking with an admin dashboard.
- **Technologies:** PHP, Laravel, Google Drive API, GCP

### Portfolio Website: [Demo](#) | [GitHub](#)

- Developed a personal portfolio website using React and Vite to showcase projects and skills.
- Focused on responsive design and user-friendly navigation to enhance user experience.
- **Technologies:** React, Vite

## VOLUNTEERING

---

### Web Developer | Trizan | Canada

Dec 2024 – Apr 2025

- Volunteered as a Web Developer at TRIZAN, focusing on backend development to enhance system functionality.
- Designed and implemented efficient server-side logic and database integrations.
